### Projects

College Project  
2021 - 2021

Online Movie Ticket Booking.

We created a web page of online movie ticket booking system using database by HTML, Css, java script. It's uses are helping people to book their movie ticket through online having many parameter.

College Project  
2022 - 2022

Medi Consult

We create an app using mobile application development. The medi consult is an app which we can know the disease by their symptoms and get near by hospital through the map which we insert that parameter in an app.

Internship Project  
2022 - 2022

Real Time Gold Price Prediction

I created a prediction page that can predict the gold price using the real time dataset. This will help the investor's that at what time they have to invest the comodity.

Major College Project  
2023 - 2023

Live Human Detection

In this project we can detect the live human by using machine learning through HOG descriptor, scm algorithm and open cv libraries. So that we can detect the live human by giving input video. This will help in the military services.
